The revenues of FICC¹, at 1,082 million euros, were up by 41.3% compared to the third quarter 2015 which was somewhat lacklustre with respect to rates and forex. They showed good growth in all business segments and BNP Paribas ranked number 1 for all bond issues in euros and number 9 for all international bond issues. At 408 million euros, the revenues of the Equity and Prime Services business unit were down for their part by 14.8% compared to a high base in the third quarter 2015 due to the less favourable context that quarter in the equity markets and despite the good growth of Prime Services. The VaR, which measures market risks, was at a very low level (28 million euros).

Securities Services' revenues, at 457 million euros, were up by 2.9% in connection with the rise in assets under custody and assets under administration.

Corporate Banking's revenues, at 958 million euros, were up by 9.2% compared to the third quarter 2015 with good business growth this quarter. Fees were up by 7.7%. Revenues were up strongly in Europe and in the Americas and up moderately in Asia Pacific where the environment was more lacklustre this year. At 130 billion euros, loans were up by 4.1% compared to the third quarter 2015 and grew in all regions. The business unit reported good performances in media-telecoms, real estate and acquisition transactions. It continued to expand its transaction banking activities (cash management and trade finance) and confirmed its number 4 global ranking in cash management².

At 2,022 million euros, the operating expenses of CIB were up by 3.5% compared to the third quarter 2015, as a result of business growth. They are well under control and benefited from cost saving measures.

CIB's cost of risk, at 74 million euros (+34 million euros compared to the third quarter 2015), remained at a low level. Corporate Banking's cost of risk was weak at 79 million euros, or 26 basis points of outstanding customer loans (+28 million euros compared to the same quarter a year earlier). Global Markets' cost of risk reflected 5 million euros in net write-backs (11 million euros in net write-backs in the same quarter a year earlier).

CIB thus posted income up sharply, at 812 million euros (+41.7% compared to the third quarter 2015).

CORPORATE CENTRE

Corporate Centre revenues were -45 million euros compared to 198 million euros in the third quarter 2015. They included -202 million euros in Own Credit Adjustment (OCA) and Debit Valuation Adjustment (DVA) (+37 million euros in the third quarter 2015). The contribution by Principal Investments grew again compared to its very good level in the third quarter 2015.

Operating expenses totalled 381 million euros compared to 302 million euros in the third quarter 2015. They factored in 37 million euros in restructuring costs related to the acquisitions¹ (34 million euros in the third quarter 2015) as well as 216 million euros in CIB transformation costs in line with the rapid implementation of the transformation plan of this operating division (0 in the third quarter 2015). They no longer included this quarter any transformation costs from the Simple & Efficient plan (126 million euros in the third quarter 2015): in line with the objective, the final costs related to this plan were booked in the fourth quarter 2015.

The cost of risk reflected 13 million euros in net write-backs compared to 6 million euro provision in the third quarter 2015.

Non-operating items totalled +22 million euros (+14 million euros in the third quarter 2015).

The Corporate Centre's pre-tax income was thus -391 million euros compared to -84 million euros in the third quarter 2015.

FINANCIAL STRUCTURE

The Group's balance sheet is rock-solid.

The fully loaded Basel 3 common equity Tier 1 ratio² was 11.4% as at 30 September 2016, up by 30 basis points compared to 30 June 2016, primarily due to the quarter's result after taking into account a 45% dividend pay-out ratio (~+20 basis points) and the effect of the initial public offering of 17.4% of First Hawaiian Bank (~+5 basis points). Risk-weighted assets were stable, excluding the foreign exchange effect which was overall negligible on the ratio.

The Basel 3 fully loaded leverage ratio³, calculated on total Tier 1 capital, totalled 4.0% as at 30 September 2016, stable compared to 30 June 2016.

The Liquidity Coverage Ratio stood at 127% as at 30 September 2016.

The Group's liquid and asset reserve immediately available totalled 326 billion euros (compared to 291 billion euros as at 30 June 2016), which is equivalent to more than one year of room to manoeuvre in terms of wholesale funding.

The evolution of the Group's ratios illustrates its solid capital generation and its ability to manage its balance sheet in a disciplined manner.

OUTCOME OF THE 2016 SUPERVISORY REVIEW AND EVALUATION PROCESS

Following the Supervisory Review and Evaluation Process (SREP) performed by the ECB for 2016, the phased-in capital requirement (CET1 ratio) that the Group has to respect on a consolidated basis was set at 8.0% in 2017¹, of which 1% for the G-SIB buffer, 1.25% for the Conservation buffer and 1.25% for the Pillar 2 requirement (P2R) (excluding the Pillar 2 guidance (P2G), which is not public). The total capital requirement is thus set at 11.5% for 2017¹. With a phased-in Basel 3 common equity Tier 1 ratio² at 11.6% and a phased-in total capital ratio of 14.4% as at 30 September 2016, the Group is well above the regulatory requirement.

The anticipated level of fully loaded Basel 3 CET1 ratio is thus 10.25% in 2019 (excluding the Pillar 2 guidance), given the gradual phasing-in of the Conservation buffer to 2.5% and the assumption of a 2.0% G-SIB buffer. It constitutes the level of CET1 taken into account starting in 2019³ for the restrictions applicable to distributions (Maximum Distributable Amount – MDA). Likewise, the anticipated level of a Total Capital requirement is 13.75% in 2019⁴.

BNP Paribas maintains its targets of a 12% fully loaded Basel 3 CET1 ratio and a total capital ratio above 15%.

Commenting on these results, Chief Executive Officer Jean-Laurent Bonnafé stated:

“With net income up at 1.9 billion euros, BNP Paribas delivered a good performance this quarter.

Thanks to its integrated and diversified business model serving its customers, it reported good growth in the revenues of the operating divisions despite the low interest rate environment. The cost of risk was significantly lower.

The Group’s balance sheet is rock-solid and the further increase in the fully loaded Basel 3 common equity Tier 1 ratio to 11.4% testifies the solid capital generation.

I would like to thank all the employees of BNP Paribas whose dedicated work made these good results possible, in line with the target set out in our 2014-2016 plan.”

² Taking into consideration CRR transitory provisions (but with full deduction of goodwill). Subject to the provisions of Article 26.2 of Regulation (EU) No 575/2013

³ 8% in 2017

⁴ Reminder: the Tier 1 and Total Capital ratios requirements are on a cumulated basis; they now include the Pillar 2 requirement (P2R) but don't include any Pillar 2 guidance (P2G)

Methodology – Comparative analysis at constant scope and exchange rates

The method used to determine the effect of changes in scope of consolidation depends on the type of transaction (acquisition, sale, etc.). The underlying purpose of the calculation is to facilitate period-on-period comparisons.

In case of acquired or created entity, the results of the new entity are eliminated from the constant scope results of current-year periods corresponding to the periods when the entity was not owned in the prior-year.

In case of divested entities, the entity's results are excluded symmetrically for the prior year for quarters when the entity was not owned.

In case of change of consolidation method, the policy is to use the lowest consolidation percentage over the two years (current and prior) for results of quarters adjusted on a like-for-like basis.

Comparative analysis at constant exchange rates are prepared by restating results for the prior-year quarter (reference quarter) at the current quarter exchange rate (analysed quarter). All of these calculations are performed by reference to the entity's reporting currency.

Reminder

Operating expenses: sum of salary and employee benefit expenses, other operating expenses and depreciation, amortisation and impairment of property, plant and equipment. In the whole document, the terms operating expenses or costs can be used indifferently.

4.2 Contingent liabilities

The Bank and certain of its subsidiaries are defendants in several actions pending before the United States Bankruptcy Court Southern District of New York brought by the Trustee appointed for the liquidation of Bernard L. Madoff Investment Securities LLC (“BLMIS”). These actions, known generally as “clawback claims”, are similar to those brought by the BLMIS Trustee against numerous institutions, and seek recovery of amounts allegedly received by the BNP Paribas entities from BLMIS or indirectly through BLMIS-related “feeder funds” in which BNP Paribas entities held interests. The BLMIS Trustee claims in these actions that the amounts which BNP Paribas entities received are avoidable and recoverable under the U.S. Bankruptcy Code and New York state law. In the aggregate, the amount sought to be recovered in these actions approximates USD 1.3 billion. BNP Paribas has substantial and credible defenses to these actions and is defending against them vigorously.

Various litigations and investigations are ongoing relating to the restructuring of the Fortis group, now Ageas, of which BNP Paribas Fortis is no longer part, and to events having occurred before BNP Paribas Fortis became part of the BNP Paribas Group. Among these are litigations brought by shareholder groups in The Netherlands and Belgium against Ageas and, among others, against BNP Paribas Fortis, in relation to its role as global coordinator of Fortis (now Ageas)'s capital increase in October 2007 to partly finance its acquisition of ABN Amro Bank N.V. These shareholder groups mainly allege that there has been a breach in the financial communication, as, inter alia, the disclosure regarding the exposure to subprime mortgages. On 14 March 2016, Ageas announced that it had entered into a proposed settlement with representatives of certain shareholder groups with respect to civil proceedings related to the former Fortis group for the events of 2007 and 2008. This settlement applies to all Fortis shareholders who held shares between 28 February 2007 and 14 October 2008, irrespective of whether they are members of a shareholder group that was represented in the negotiation of the settlement. The parties requested the Amsterdam Court of Appeals to declare the settlement to be binding on all Fortis shareholders who are eligible to participate in it, in accordance with the Dutch Act on Collective Settlement of Mass Claims (“Wet Collectieve Afwikkeling Massaschade” or “WCAM”). BNP Paribas Fortis will be able to invoke this settlement if it becomes final and binding.

All ongoing civil litigations in Belgium and in the Netherlands involving BNPP Fortis as per its aforementioned role are currently suspended.

Litigation was also brought in Belgium by minority shareholders of Fortis against the Société fédérale de Participations et d'Investissement, Ageas and BNP Paribas seeking (amongst other things) damages from BNP Paribas as restitution for part of the BNP Paribas Fortis shares that were contributed to BNP Paribas in 2009, on the ground that the transfer of these shares was null and void. On 29 April 2016 the Brussels Commercial court decided to stay the proceedings until the resolution of the pending Fortis criminal proceeding in Belgium.

Regulatory and law enforcement authorities in multiple jurisdictions are conducting investigations or making inquiries of a number of financial institutions regarding trading on the foreign exchange markets, including, among other things, possible collusion among financial institutions to manipulate certain

benchmark currency exchange rates. The Bank has to date received requests for information in this respect from regulatory and law enforcement authorities in the United Kingdom, the United States and several countries in the Asia-Pacific region as well as from the European Competition Commission. The Bank is cooperating with the investigations and inquiries and responding to the information requests. In November 2014 the Financial Conduct Authority in the United Kingdom, in December 2014 the Hong Kong Monetary Authority and in October 2015, the Financial Services Agency in Japan informed the Bank that they had discontinued their investigation as to BNP Paribas. Moreover the Bank is conducting its own internal review of foreign exchange trading. While this review is ongoing, the Bank is not in a position to foresee the outcome of these investigations and proceedings nor their potential impact.

The Bank, along with a number of other financial institutions, was named as a defendant in several consolidated civil class actions which were filed starting in March 2014 in the U.S. District Court of New York on behalf of purported classes of plaintiffs alleging manipulation of foreign exchange markets. It is worth noting that US antitrust proceedings provide for joint and several liability of all defendants. Without acknowledging liability, the Bank along with several of its co-defendants reached an agreement with plaintiffs to settle this consolidated civil class action. In December 2015, the U.S. District Court of New York issued a preliminary settlement order approving the settlement agreement entered into by the Bank in an amount of USD 115 million.

In connection with the European Commission's investigation into purported anti-competitive conduct in the Credit Default Swaps ("CDS") market between a number of investment banks including BNP Paribas (the closure of which was announced by the European Commission on 4 December 2015), several class actions lawsuits were filed in U.S. courts against such parties. It is worth noting that US antitrust proceedings provide for joint and several liability of all defendants. Without acknowledging liability, the Bank and its co-defendants reached an agreement with the plaintiffs to settle these class actions. In October 2015, the U.S. District Court of New York issued a preliminary settlement order approving the settlement agreement entered into by the Bank in an amount of USD 89 million.
